The Awakening effect is achieved only by contact with the soul. The ability to hear yourself, trust another person, give the good result in understanding and answering to the question “So what do I want really?” During the massage session master communicates with guest. By answers it can be judged what is the source “soul” or “brain”. Massaging body points, master feels every tense in guest’s body. Body can’t lie! If the body is relaxed, there’s no tension, energy is flowing through the canals, you’re Saint person. If “no” so congratulations – you have the points to improve!

Without any doubts work of improving yourself is the long process, however pretty exciting. And the main award is the peace in soul, harmony in all areas of our life, realization of our aims, plans and thoughts.

Let yourself to communicate with soul and it’ll tell you a lot.

### The difference between “Awakening” massage and other practices:

- Everything that takes place during the session are answers only concrete client and only at the concrete moment. Master neither memorizes no makes notes. Master does not add anything
- Master doesn’t give the “only” correct answer as the soul has different variants of the future development and only client decides how to act;
- Master asks open questions, and listen to the guest pretty attentive and gives the feedback;
- Massage is used in the majority of cases dotted, dealing with problematic zones;
- Master can use some elements of meditation, breathing techniques for mind relaxing and immersion to the guest’s consciousness to the relaxing state. Guest all the time stay in conscious state;
- The method excludes any manipulations.

This massage is done by the masters with great experience and understanding Laws of Nature. They can help you to identify methods of tasks solving also by relaxing he body. It is absolutely unique opportunity for person who desires the changes after several sessions starts already (from 5) change life to the better way.

### Thai massage. The Legacy of Dr. Jivak:

Dr. Jivaka lived more than two thousand years ago. He was a personal doctor of the Indian king. That time he invented a special massage technique, which even then was able to replace many medical treatments. This massage is currently called Thai. And this is despite the fact that the technique comes from India. Thai massage for two in Kiev also uses these techniques, and you can feel all its advantages by coming to our salon.

It is because the development of technology received it in Thailand, becoming part of its national tradition and culture, as well as finding a philosophical areola around itself. Using massage at the same time as saying prayers, as well as with physical exercises, can help achieve a purification of the body, as well as bring harmony to internal energy.

Thai massage for two in Kiev introduces one of the oldest methods of traditional oriental medicine. It turns to be possible to bring the body to harmony largely due to the intense impact on the so-called energy lines located throughout the human body. You will feel an extraordinary stream of vitality, as well as experience incredible pleasure, reaching a state of maximum relaxation.

### Why Thai massage is greatly effective?

The price of Thai massage is quite available, so you can visit the masseur regularly. The master, who perfectly masters the Thai massage technique, makes it possible to improve not only the general level of health on the high level, but also to perform a number of individual tasks. For example, you can significantly improve the tone of blood vessels and improve joint mobility.

The session lasts for a long time, as we try to please the visitors of our salon as much as possible. During the session, the specialist stimulates several important acupuncture points that are located on our body. According to Thai philosophy, the energy of the cosmos penetrates into our body through these points. If the points are blocked, the body will be in the so-called energy blockade. This can lead to the development of various diseases.

Argan, cinnamon, ginger, cardamom, saffron, vanilla, nutmeg, cloves, coriander - all together they perform the basis of treatments and procedures during which you will feel exotic and be transported by body and mind to the world of the Far East. New experience for all five senses ...

*A song that reflects all its uniqueness and being.  
From silence a man is born and with him his unique song of the soul.  
The song that fills with love, tenderness and energy comes from childhood.  
Feel yourself in the cradle of love ...  
Listen to the song of your soul ...  
Allow yourself to be real, and open up the power inside ...  
Hear yourself inside, remember who you are ...*

Sound massage – the most tender and reverent touch to the body and soul. "Healing sound" washes like sea waves, removing the bustle of thoughts and tension in the body. The overtone-rich, clean sounds of forged Tibetan bowls successfully withstand the ravages of vibrations produced by fluorescent lamps, electrical appliances, cell phones and other products of modern civilization.

## TIBETAN MASSAGE WITH SINGING BOWLS “HEALING SOUND”

№	Service Description	Duration of staying at salon (min)	Price/UAH (1 person)	Price/UAH (2 person)
1	Relaxing massage “Healing sound” 60 min + tea ceremony	75 (1 hour : 30 min)	1200	1500
2	Relaxing whole body massage “Healing sound” deep relaxing 90 min + tea ceremony	105 (1 hour : 45 min)	1500	2000

It has long been known that with the sound of church bells, people were purified from diseases in the big cities and villages. The sound waves of the Tibetan bowls have the same healing effect. Each bowl has its own voice (its own soul), since ancient times Tibetan bowls are made manually by monks from a special alloy of metals, with prayers and chants.

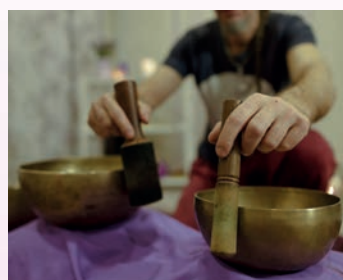

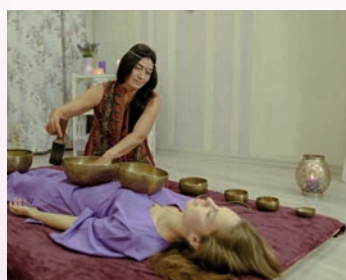

The human body is almost 80% water, in which sound waves travel at fantastic speed. Vital vibrations that carry a powerful charge of bioenergy instantly spread through all tissues, enter into resonance with the body at the cellular level, harmonize the state and restore its original frequency of sound.

### The benefits of Tibetan “Healing Sound” massage:

- Removal of irritability and fatigue, immersion in deep mental and physical relaxation, improvement of the respiratory rhythm.
- Normalization of blood pressure and recovery of the immune system, stabilizes the heartbeat
- Relief from emotional trauma caused by stress, improved sleep.
- Deep impact on energy channels, balancing aura and chakras
- Inclusion in the body of self-healing mechanisms, improving blood circulation and cell renewal in the body.
- Synchronization of the right and left hemispheres.
- Improving the ability to concentrate, the disclosure of creativity and interest in life.

### After the Tibetan “Healing Sound” massage, you will feel:

- Total relaxation in the whole body, followed by a surge of strength.
- Freedom from the chaos of endless thoughts and excess information, a state of clarity and peace of mind at the moment "here and now".
- Filling with vital energy, awakening interest in life, a state of harmony and love in the soul
- Restoration of psycho-emotional health, removal of irritability and fatigue, relaxation and harmony.
